

Reinforced coating systems: protect & decorate

Descoglas™ seamless wall and ceiling coating systems combine low VOC, high performance polymer technology with fiberglass reinforcement for superior durability and dimensional stability. Field-proven for connecting unlike substrates without the use of joints, sealants and wall/ceiling connections, Descoglas™ systems produce an attractive, seamless and easy-to-clean wall and ceiling finish that is resistant to harsh chemicals and physical abuse.

- Seamless surface with superior dimensional stability, durability & cleanability
 - Stands up to intense impact, abrasion, chemical exposure
 - Withstands daily high-pressure steam cleaning, thermal shock
 - Resists flaking, chipping and cracking; will not embrittle with age
 - Static-resistant surface inhibits build-up of dust and other airborne particles
- Suited for variety of substrates; roller- or spray-applied
- Versatile reinforcement options
- Low odor, ultra low VOC; may be installed in occupied areas
- USDA approved; accepted by the Canadian Department of Agriculture
- Available in a variety of standard and custom colors
- Seamlessly ties into Valspar cove base & floor systems
- Optional antimicrobial formulation

Reinforced Systems: Maximum impact resistance

> DESCOGLAS™ RM

Fiberglass Mat Reinforced Wall/Ceiling System. This high build, multi-layer surfacing system combines the proven strength of reinforcing fiberglass with 100% solids thermosetting resins for superior impact resistance and dimensional stability.

> DESCOGLAS™ RF

Reinforcement-Filled Wall/Ceiling System. This high-build surfacing system utilizes 100% solids, fiber-filled thermosetting resin for simplified installation and accelerated turnaround.

Non-Reinforced System: For lower-abuse areas

> DESCOGLAS™ NR

Wall/Ceiling System. Commonly used in conjunction with Descoglas reinforced systems, this 12-14 mil surfacing system is ideally suited for upper walls, ceilings and other low-impact areas.

Descoglas™

Reinforced Wall & Ceiling Coating Systems

COMMERCIAL & INSTITUTIONAL

- business office buildings
- cafeterias/restaurants
- correctional institutions
- retail & shopping centers
- schools/education facilities
- sports & entertainment venues

HEALTH CARE

- animal holding facilities
- health care facilities
- veterinary clinics

INDUSTRIAL & MANUFACTURING

- beverage processing
- chemical processing
- electronics
- food processing
- manufacturing, heavy
- manufacturing, light
- pharmaceutical production
- water treatment

TRANSPORTATION

- aircraft hangars
- automotive dealerships
- parking decks
- transportation terminals
- vehicle maintenance areas

COMMON AREAS

- aisleways/corridors
- chemical areas
- clean rooms
- cold storage
- kitchens
- laboratories
- loading docks
- lobby areas
- mechanical rooms
- mezzanines
- restrooms & shower areas
- warehouse/distribution

Proven Performance in Class 10–1000 Areas

Descoglas™, originally introduced in 1962 as a racquetball court wall and ceiling system, is now the industry standard for impact resistant, easily maintainable wall and ceiling finishes. These versatile systems serve a wide range of high performance requirements.

- Clean room environments: pharmaceutical, research, electronics
- Health care facilities: operating rooms, scrub rooms, intensive care areas, therapy areas, corridors
- Food & beverage processing facilities
- Commercial kitchens, dishwashing and waste disposal areas
- Ballcourts, including racquetball

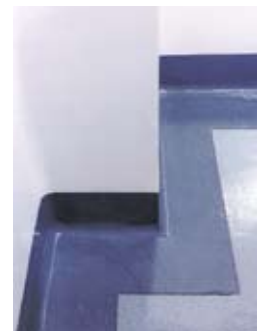

The Ultimate Connection

Seamless Wall, Floor & Ceiling Integration

The technologically advanced Descoglas™ wall system from Valspar offers smooth, seamless environments. By wrapping or tying the wall and ceiling into the floor and base and by rounding inside corners, the cracks and crevices that commonly harbor dirt and encourage bacterial growth are eliminated. The result is a seamless, aesthetic, high performance surface that is easy to clean and maintain.

Descoglas™ systems eliminate non-sterile crevices and ragged junctures, providing seamless, rounded floor, wall and ceiling connections ideally suited for environments demanding sterile surfaces.
